

ABOUT

Oynos wines are made from grapes cultivated without recourse to synthetic fungicides, herbicides or fertilizers. We believe that organically-grown grapes have a head start and are the best base for quality wines because they are not in a cycle of chemical dependency. In vineyards where the environment is respected and biodiversity encouraged, the vines grow in a living

soil, full of worms and bacteria. This enables them to draw upon the optimum levels of minerals from the soil. In turn these healthy vines develop better resistance to disease and go on to produce fruit for years to come.
